

NordLoom

NordLoom supplies certified sustainable textiles to global brands and manufacturers.

NordLoom introduces eco-friendly Banana Fiber Fabrics to the Nordic textile market - combining innovation, sustainability, and Scandinavian design.

We bring durability, comfort, and environmental responsibility together for a greener future in fashion and home textiles.

In collaboration with our partner company in India, we are proud to be the globally certified by SGS for our Banana Fiber content.

Our company offers a variety of textile fabrics for different applications, including:

- Woven Shirting Fabric
- Woven Suiting Fabric
- Knitted Fabric
- Home Textile Fabric
- Canvas Fabric
- Yarns and Uppers for the Footwear Industry
- Technical Textiles
- Medical Textiles

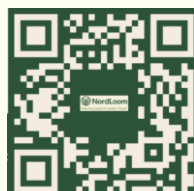

These fabrics and yarns are crafted with 60% Banana Fiber and 40% other natural fibers (Cotton or Linen), offering a truly sustainable solution for the textile industry.

Key Features of Our Fabrics:

- > Antibacterial & Antimicrobial Properties
- > Inherent Breathability
- > Environmentally Friendly & Chemical-Free Processing

NordLoom fabrics are certified sustainable materials meeting global standards by SGS, **ISCC PLUS**, and **Higg Index** ensuring quality, transparency, and verified carbon traceability.

For the first time in the Nordic region, we are offering unique, certified, and environmentally conscious fabrics that promise to change the way textiles are produced and consumed.
